### Practice Question 1 Answers

What's the latest fad in sport? Drone racing. Popular with technology geeks and thrill seekers, drone racing combines virtual reality technology with video game competition.

The history of drone racing starts in 2014. Instead of flying drones around a field, amateur flyers decided to have fun by organizing races. Small cameras on the drones allowed flyers to record and upload races. As video clips of racing drones spread across social media, interest in the sport grew.

### Practice Question 2 Answers

The red chili pepper probably first started to grow in Mexico. The Aztecs and Mayas ate red peppers and used them as a drug to help sick people.

Red pepper's movement started with Christopher Columbus. In 1492, he visited a small island near Mexico called the Dominican Republic. He took red chili peppers back to Spain, but not much happened after that. Some people grew peppers in gardens because they looked interesting, but it was not considered food. In time, someone discovered that peppers made food taste good.

### Practice Question 3 Answers

Smartphones weren't common until about ten years ago. Before Smartphones, mobile phones were used to make calls and send text messages. The first Smartphone was the IBM Simon. It was on sale in 1992. It was a simple version of the Smartphone we see today. The Simon was a mobile phone with a touch screen that could send and receive emails and faxes.

In 1997, the Swedish company Ericsson made a new phone. It was called the "Smartphone." That was how the word "Smartphone" started. Soon many companies started making Smartphones. Nokia made the first phone with a colored screen. Sony made the first Smartphone with a camera.
