

## A Puzzling Story Worksheet 6-1

The pictures tell a story about man who wants to move a wolf, goat and head of cabbage from his home on the left side to an island on the right side. There are a few problems. He can only carry one thing in his boat at a time. Plus, the goat will eat the cabbage, if left alone together, and the wolf will eat the goat, if left alone together. Your job: solve the puzzle by putting the pictures in the correct order. Then, write the story.
